

# THE VRSENAL X4

4 PLAYERS • 70 SQUARE FEET • ZERO LABOR

When does 2 + 2 equal more than 4?  
When you put **two VRsenal V2 units back to back!** The X4 becomes the centerpiece to your arcade generating more excitement and more revenue than any other VR attraction.

## **Engage More Players; Make More Money**

The best way to get people to try virtual reality is showing others having fun playing it.

The X4 can handle 40-players per hour. That's the highest throughput of any unattended VR attraction. It means that rather than people watching others having fun awaiting their turn, they swipe their card and jump right in to join the fun.

At an average price per play of \$5, high-traffic locations can generate as much as \$2000 per day. And with no labor cost or royalties, all that goes to your bottom line.

## **Quality content; Fast, Furious Gameplay**

The X4 is a true VR gaming platform. Your investment in the best VR arcade hardware will pay off for years to come. VRsenal is committed to bringing you the best games from the biggest names.

You take a strategic approach to games. The X4 gives you the best selection of games to attract the broadest possible audience of players.

# A DIVERSE SELECTION OF GAMES

A diverse selection of games means players are more inclined to play the X4 again and again. Which is why the it is out-earning the V2 by more than 100%.

LIGHTSABER DOJO

## Vader Immortal: *LightSaber Dojo* — A Star Wars Story

1/3 of your customers are Star Wars Fans, and they're rabid for immersive experiences. Let your customers live out their fantasies taking on Darth Vader in an epic lightsaber battle?
